Education

Astana IT University	Astana, Kazakhstan
Bachelor of Science in Mathematical and Computational Science	Expected July 2029
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Discrete Mathematics, Linear Algebra, Calculus.	
Secondary School	Astana, Kazakhstan
Academic Honors & Test Scores: SAT: 1520 / 1600 (98th percentile)	Graduated June 2026

Experience

CIT DAMU (ТОО «ЦИТ ДАМУ» / Damumed)	Astana, Kazakhstan
<i>QA Engineer Intern</i>	July 2024 – August 2024

- Executed manual functional, regression, and user workflow testing on digital healthcare web platforms (Damumed), ensuring data integrity and system stability.
- Authored and executed 40+ comprehensive test cases, verification checklists, and boundary-value scenarios prior to major release cycles.
- Isolated, reproduced, and documented defects with reproduction steps, network payloads, and system logs, accelerating bug resolution with engineering leads.
- Collaborated with QA engineers and analytical support specialists to validate medical workflows, usability standards, and cross-browser reliability.

Technical Projects

Modular Telegram Userbot & AI Assistant	Python, Telethon, OpenAI Whisper
<i>Lead Developer & Maintainer</i>	github.com/abbakkio/telegram-userbot

- Architected and developed an asynchronous modular Telegram client in Python using Telethon, running continuously as a native macOS background daemon.
- Integrated local OpenAI Whisper speech-to-text pipeline to automatically transcribe incoming voice notes and audio messages in real-time with sub-second latency.
- Engineered smart QR code authentication, automated multi-language translation, self-destructing message handlers, and dynamic animated typing modules.

Interactive Developer Platform & Portfolio	React, TypeScript, Tailwind CSS, Vite
<i>Fullstack Developer & Designer</i>	abbakkio.dev

- Designed and built a responsive, high-performance web platform featuring custom micro-interactions, an Apple-inspired dynamic island toast system, and dark/light themes.
- Engineered a synchronized GitHub activity heatmap widget fetching live commit history via REST API with responsive tooltip inspection and cached fallback.
- Optimized production frontend bundle size, asset loading, and accessibility (WCAG compliant) to achieve near-perfect 100 Lighthouse performance metrics.

Skills & Interests

- **Technical Skills:** Python, TypeScript, JavaScript, C++, Swift, SQL, React, Next.js, FastAPI, Node.js, Tailwind CSS, Git, Docker, Linux/macOS, Postman, Vite, Framer.
- **Languages:** Russian (Native), English (Fluent / Professional – SAT: 1520).
- **Interests:** UI/UX Design, Open Source Tooling, Algorithmic Problem Solving, Human-Computer Interaction.
